\$ 700.00				MT-

## **MASTER THOROUGHFARE AMENDMENT PROCESS**

### **04/05**

*Property owners, land developers, the City Council, the City Plan Commission, and city staff may request a Master Thoroughfare Plan Amendment through the following process:*

- 1. Applicant meets with the Transportation/Public Works Department to express the desire for a proposed change. Depending on the nature and complexity of the request, TPW may require a pre-submittal conference with the appropriate city staff, to be arranged by the platting planner.*
- 2. Applicant submits an official request for the thoroughfare change to the Planning and Development department. (See Application)*
- 3. Planning and Development Department distributes the request to various city departments and related entities for review and comment, including: Fire, Health, Parks and Community Service, Police, Transportation and Public Works, Water Department, Water Control Board, School Districts, Franchise Utility Companies and TXDOT.*
- 4. City Departments and Others Listed Above review the request.*
- 5. City Departments hold a pre-development review committee meeting to discuss the requested change.*
- 6. City Departments prepare staff reports and return to the Planning and Development Department.*
- 7. Planning and Development Department compiles staff reports from city departments and other entities into a Development Review Committee report.*
- 8. Planning and Development Department will mail out notice of the public hearing to property owners that are located within 300 feet of the requested amendment. However, amendments initialized by the Planning and Development Department as part of a large area updating the Master Thoroughfare Plan require only publication of a notice in a newspaper of general circulation.*
- 9. Development Review Committee, consisting of representatives from city departments, meets with the applicant to discuss staff comments and recommendations.*
- 10. Planning and Development Department prepares a final staff report for the City Plan Commission.*
- 11. City Plan Commission holds a public hearing and makes final recommendation to the City Council.*

12. *City Council holds a public hearing, & then makes a final decision based on that hearing and the City Plan Commission recommendation. If City Council approves the request, the Transportation and Public Works Department will update the Master Thoroughfare Plan.*
